CÚNNTAS

DO

EARNÁN DE BLAGHD, AIRE UM RIALTAS AÍTIÚIL.

I have the honour to submit the Fifty-eighth Annual Report on the Marriages, Births and Deaths registered in Ireland during the year 1921.

The results of the registration for the year show low marriage, birth and death rates, the mortality rate being the lowest recorded for the entire country.

The number of marriages recorded for Ireland was 23,223, being equivalent to 5·17 per 1,000 of the estimated population, as compared with 5·98 per 1,000 in 1920 —the highest annual rate recorded for Ireland—and an average of 5·39 per 1,000 for the ten years, 1911-20.

The births registered in Ireland in 1921 numbered 90,720, or 20·2 per 1,000 of the estimated population. This rate is, with the exception of those for the three years, 1917-19, lower than the rate for any year from 1864. It is 2·0 below the rate for 1920 and 1·5 below the average for the ten years, 1911-20.

The number of deaths registered in 1921 amounted to 63,838, a number equivalent to 14·2 per 1,000 of the estimated population, which is, as stated above, the lowest rate recorded for Ireland. It is 0·6 per 1,000 under the low rate for 1920, and 2·6 per 1,000, or 15·5 per cent., under the average for the ten years 1911-20.

Deaths from tuberculous disease which fell from 8,643 in 1919 to 7,651 in 1920 further declined to 7,068 in 1921, being equivalent to 1·57 per 1,000 of the population. This mortality rate, which is 0·13 per 1,000 under that for 1920, and 0·53 per 1,000 under the average for the ten years 1911-20, is the lowest rate for tuberculosis recorded for this country.

The reduction in the mortality from bronchitis and pneumonia contributes largely to the reduction in the general death rate. In 1919 the number of deaths from these causes amounted to 11,838, followed in 1920 by 9,375 deaths and in 1921 by 7,917 deaths.

In 1921 deaths by violence in its various forms numbered 2,760, being 936 above the average for the preceding ten years and 909 above the number of such deaths registered in 1920.

TABLE I.—Showing for each of the years 1911–21 the estimated **Population*** ; the number of **Marriages, Births** and **Deaths** registered, and the number of **Emigrants** (Natives of Ireland) enumerated, with the rates per 1,000 of the estimated Population represented thereby; and the averages for the ten years, 1911–1920.

* See page 44.

MARRIAGES.

During the year 1921 the marriages registered numbered 23,223, being equivalent to a rate of 5·17 per 1,000 of the estimated population ; this rate is 0·81 under that for the previous year, and 0·22 under the average for the ten years, 1911-20.

Of these marriages 16,187 were of Roman Catholics, as compared with 18,290 in 1920 ; the remaining marriages numbering 7,036 in 1921, as against 8,536 in 1920. Included in the 7,036 marriages are 3,307 celebrated according to the rites and ceremonies of the Church of Ireland, as against 3,937 in 1920 ; 2,651, as compared with 3,215 in 1920, were in Presbyterian Meeting-houses ; 530, as against 678 in 1920 in " Registered Buildings" belonging to various religious denominations ; 530 by civil contract in the Registrars' offices, as against 678 in 1920 ; two were according to the usages of the Society of Friends, as against 1 in 1920 ; and 16, as compared with 27 in 1920, were according to the Jewish rites.

The marriages of Roman Catholics are equivalent to a rate of 4·88 per 1,000 of the estimated Roman Catholic population, or 0·29 below the corresponding average rate for the preceding ten years, and the other marriages are equivalent to a rate of 5·99 per 1,000 of all persons other than Roman Catholics in the population, this rate being 0·04 below the corresponding average rate for the ten years, 1911-1920.

TABLE II.—MARRIAGES registered in Ireland in 1921, and in each of the previous ten years, according to the MODES OF CELEBRATION ; with the rate per 1,000 of the population represented thereby.

As derived from the figures given in the Abstract of Marriages, pages 8-9,it will be found that 88.8 per cent. of the total marriages were those of bachelors and spinsters ; that 6·3 per cent. were those of widowers and spinsters ; that 3·3 per cent. were marriages of bachelors and widows ; and that those of widowers and widows formed 1·6 per cent. of the total marriages. Thus, of the men married 7·9 per cent. were widowers, and of the women 4·9 per cent. were widows ; in 11 instances in every 100 marriages, one or both of the contracting parties had been in the married state before.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education in Ireland. In the year 1921 there were 22,642 or 97·5 per cent. of the husbands, and 22,935, or 98·8 per cent., of the wives, who wrote their names, and the remainder signed by "mark," as against 22,031, or 93·9 per cent. of the husbands, and 22,544 or 96·0 per cent. of the wives in the year 1911.

BIRTHS.

The number of births registered during the year 1921 was 90,720—46,517 boys and 44,203 girls— the ratio per 1,000 of the estimated population being 20·2, which is 1·5 below the average rate per 1,000 for the ten years, 1911-1920.

The total births in 1921 are 8,816 below those registered in the preceding year, viz., 99,536.

The proportion of male infants born alive in 1921 was 105·2 to every 100 females; in 1920 it was 106·2 to 100; in 1919 it was 107·1 to 100; in 1918 it was 104·7 to 100; in 1917 it was 105·2 to 100; and in 1916 the proportion was 106·5 males to 100 females.

Of the 90,720 births registered in Ireland during the year, 87,846 or 96·8 per cent. were legitimate, and 2,874 or 3·2 per cent. were illegitimate, the latter being 0·1 below the percentage for the preceding year. As regards illegitimacy Ireland compares favourably with most other countries.

The male children born in wedlock numbered 44,985, and the female 42,861, or 105·0 of the former to every 100 of the latter; of the illegitimate children 1,531 were males, and 1,343 females, being 114·0 boys to 100 girls.

Of the children born in Ulster, 3·9 per cent. were illegitimate; in Leinster the percentage was 3·3; in Munster, 2·7; and in Connaught, 1·2; the corresponding percentages for the preceding year being:—for Ulster, 4·2; for Leinster, 3·5; for Munster, 2·8; and for Connaught, 0·9.

In the provinces the rates represented by the total births registered during the year 1921 were as follows:—Leinster, 21·7 per 1,000 of the population in 1911; Munster, 18·8; Ulster, 22·6; and Connaught, 17.1.

Of the total births, 51·7 per cent. were registered in the first six months of the year (181 days), and 48·3 per cent. in the second six months of the year (184 days).

The total number of births registered in the first quarter of the year was 22,733; in the second, 24,137; in the third, 22,814; and in the fourth, 21,036.

MULTIPLE BIRTHS.

There were 1,165 twin births and 5 triplet births registered in Ireland during the year 1921. The twin births were 1·28 per cent. of the total births, 1·32 per cent. of the single births, and 1.30 per cent. of the total mothers.

DEATHS.

The deaths registered in Ireland during the year numbered 63,838, and afford a rate of 14·2 per 1,000 of the population, estimated to the middle of 1921. Of the deaths 32,409 were of males, and 31,429 of females, equivalent in each case to 14·2 per 1,000 of the male and female population, respectively.

The total death-rate is 0·6 per 1,000 below that for the year 1920, and 2·6 below the average death-rate for the 10 years, 1911-1920.

For the province of Leinster the death-rate was 15·5 per 1,000, for Munster, 13·7, for Ulster, 15·2, and for Connaught, 12·5.

Of the total deaths, 18,639 were registered in the first quarter, 17,007 in the second, 13,970 in the third, and 14,222 in the fourth.

Of the deaths registered during the year under review, 55·8 per cent. occurred during the first six months, and 44·2 per cent in the remaining six months.

The annual rates represented by the deaths registered in each quarter are as follows:—16·6 per 1,000 of the population for the first quarter; 15·1 for the second; 12·4 for the third; and 12·7 for the fourth. The rate for the first quarter is 3·4 below, for the second 2·3 below, for the third 1·1 below, and for the fourth 3·3 below the average rate for the corresponding quarters in the ten years, 1911-1920.

It will be observed from the table on page 32 *that* 4,235 *of the* 63,838 *deaths registered during the year took place in Infirmaries and General and Special Hospitals;* 1,416 *in Public Lunatic Asylums;* 8,003 *in Workhouses and Workhouse Hospitals; and* 50,184 *were of persons who died "At their Own Homes," etc.*

Of the total deaths registered in Ireland 6·6 per cent. occurred in "Infirmaries and General and Special Hospitals," the percentages for the four provinces varying from 1·7 in Connaught to 13·6 in Leinster. Deaths which took place in the Workhouses or Workhouse Hospitals constituted 12·5 per cent. of the total deaths, the respective percentages of these deaths for the provinces being—Leinster, 14·6; Munster 18·0; Ulster, 9·2; and Connaught, 8·2.

CAUSES OF DEATH.

In the table which follows, the number of deaths from some of the principal diseases are shown for the years 1920 and 1921, also the averages for the 10 years, 1911-1920.

Causes.	Number of Deaths registered			Causes.	Number of Deaths registered.		
	Years.		Average 10 years 1911-20		Years.		Average 10 years 1911-20
	1921.	1920.			1921.	1920.	
Enteric Fever	177	245	266	Cancer	3,895	3,823	3,812
Typhus ...	19	42	39	Pneumonia	3,502	4,134	4,357
Measles ...	185	505	612	Bronchitis	4,415	5,241	6,307
Scarlet Fever	161	315	297	Diarrhœa and Enteritis under two years of age	1,300	908	1,259
Whooping-cough	582	980	792				
Diphtheria ...	604	519	323				
Dysentery ...	29	20	22	Puerperal Septic Diseases	187	252	196
Influenza ...	964	1,256	2,922				
Cerebro-spinal Fever ...	33	30	48	Accidents of Pregnancy and Childbirth ...	269	298	296
Tuberculous Disease ...	7,068	7,651	9,193				

It will be seen from this table that deaths from tuberculosis, which in the year 1920 numbered 7,651, fell to 7,068 in the year 1921; deaths from influenza from 1,256 to 964; deaths from bronchitis and pneumonia from 9,375 to 7,917. From the principal epidemic diseases, with the exception of diphtheria, diarrhœa and enteritis of children under 2 years of age and dysentery, decreases are also shown—deaths from whooping cough fell from 980 in 1920 to 582 in 1921; deaths from measles from 505 to 185; deaths from scarlet fever from 315 to 161; deaths from enteric fever from 245 to 177; and deaths from typhus from 42 to 19. Deaths from puerperal septic diseases fell from 252 to 187 and from accidents of pregnancy and childbirth from 298 to 269. On the other hand, deaths from cancer increased from 3,823 in 1920 to 3,895 in 1921; deaths from diarrhœa and enteritis of children under 2 years from 908 to 1,300; deaths from diphtheria from 519 to 604; deaths from cerebro-spinal fever from 30 to 33; and deaths from dysentery from 20 to 29.

Enteric Fever.—Deaths under this heading numbered 177, being 68 under the number registered (245) in 1920, and 89 below the average (266) for the ten years, 1911-20. Of the 177 deaths, 91 were those of males and 86 of females. These include the deaths of one male and one female from paratyphoid fever.

Typhus.—To this cause 19 deaths (10 of males and 9 of females) were attributed. This number, which is 23 below that recorded in 1920, viz., 42, and 20 below the average (39) for the ten years, 1911-20, represents the lowest mortality from typhus recorded for Ireland.

Small-Pox.—No case of this disease was reported during the year.

MEASLES.—Only 185 deaths (96 of males and 89 of females) were recorded for the year under review, as against 505 in 1920, and an average of 612 for the ten years ending with the latter. In 1914 there were 1,003 deaths from this cause, falling to 257 in 1919, which number is the lowest recorded for any of the ten years 1911-20. The number of deaths from measles in the year 1921 constitutes a record for Ireland, in respect of low mortality.

SCARLET FEVER.—This disease also shows a low mortality—161 deaths—(of males 73 and of females 88) for the year 1921, being about half the number registered (315) in 1920 and 136 under the average (297) for the ten years, 1911-20.

With the exception of 1918, when 91 deaths were registered, the mortality from scarlet fever for 1921 was the lowest during the last ten years.

WHOOPING-COUGH.—The fatal cases of this disease, which amounted to 582 (of males 250 and of females 332) are 398 under those recorded (980) for 1920 and 210 under the average (792) for the decennium, 1911-20. In the latter period the number of deaths fell from 1,045 in 1912 and 1,031 in 1918 to 525 in 1917 and to 445 in 1919.

DIPHTHERIA.—The highest annual mortality from diphtheria recorded for Ireland from the 1st January, 1864, (the date of the establishment of civil registration) characterized the year 1921, during which 604 deaths were registered, being 85 above the number recorded (519) in 1920 and 281 above the average (323) for the ten years 1911-20. The next highest number (565) was recorded in 1874, the year 1920 coming next with 519 deaths. It will be observed that the deaths in 1921, comprising 293 of males and 311 of females, and representing a rate of 0·13 per 1,000 of the population, are 93 per cent. above the average for the preceding ten years.

Of the 604 deaths from diphtheria, 83 occurred in Cork Superintendent Registrar's District, 67 in Dublin, 51 in Limerick, 39 in Lisburn, 12 in Fermoy, 11 in Inishowen, 10 in Banbridge, and 10 in Swineford.

About 48 per cent. of the total deaths from diphtheria were those of children under 5 years of age, numbering 287—153 of males and 134 of females.

DYSENTERY.—Twenty-nine deaths from this disease were registered during the year, as compared with 20 in 1920 and an average of 22 for the ten years, 1911-20.

DIARRHŒAL DISEASES.—Of 1,734 deaths from diarrhœa and enteritis, 1,300 (of males 715, and of females 585) were those of children under 2 years of age. This number is 392 above that for 1920 and 41 above the average for the ten years ending with the latter period.

INFLUENZA.—To this cause 964 deaths, representing 0·21 per 1,000 of the estimated population, were ascribed. This number, comprising 489 deaths of males and 475 of females, includes 268 registered as from influenza with pulmonary complications, and 696 deaths as from influenza with other complications, or unqualified by any further statement. The 964 deaths are 292 under the recorded deaths (1,256) for 1920 and 1,958 under the average (2,922) for the ten years, 1911-20.

ERYSIPELAS.—Deaths returned as from erysipelas numbered 58, the deaths of males being 28 and of females 30. In 1920 the deaths from this cause amounted to 67.

ACUTE POLIO-MYELITIS.—Eleven deaths were attributed to this disease, 6 being deaths of males and 5 of females.

ENCEPHALITIS LETHARGICA.—There were 50 deaths from this malady in 1921, including 31 deaths of males and 19 of females, as compared with 18 deaths of males and 25 of females in 1920.

TABLE III.—Showing the number of Deaths from All Causes, from some of the during each of the eleven years, 1911-1921, with the average Annual Number Population represented by the number of deaths from these causes, and the

NOTE —The Classification of Causes of Death adopted for 1921 is in accordance with the International as far as possible, in order to afford comparison with those for 1921. The numbers in brackets

CEREBRO-SPINAL FEVER.—The fatal cases of cerebro-spinal fever numbered 33 (of males 21 and of females 12) as against 30 (of males 19 and of females 11) in 1920, and an average of 48 for the ten years, 1911-20.

OTHER ENDEMIC AND EPIDEMIC DISEASES.—There were 10 deaths from malarial fever, 5 from mumps, 3 from varicella and 2 from German measles.

TETANUS.—Forty deaths from this malady were registered, the deaths of males numbering 29 and of females 11, as compared with 19 of males and 11 of females in the preceding year.

TUBERCULOSIS.

The total number of deaths from all forms of tuberculous disease registered in Ireland during the year 1921 was 7,068, being equal to 1·57 per 1,000 of the estimated population.

This mortality from tuberculosis is the lowest on record for Ireland, the deaths being 2,125 under the average (9,193) for the preceding decennium, 2,555 under the number (9,623) for 1911, and 583 under the number (7,651) for 1920.

Of the 7,068 deaths, 3,353 were those of males, representing 1·47 per 1,000 of the estimated male population, and 3,715 were deaths of females, being equivalent to 1·68 per 1,000 of the estimated number of females in the population.

In England and Wales the death rate for tuberculosis was 1·13 per 1,000 and in Scotland it was 1·17 per 1,000 of the population.

Among the total deaths from tuberculosis registered in Ireland were 2,233 in the province of Leinster, or 1·92 per 1,000 of the population; 1,469 in the province of Munster, or 1·42 per 1,000; 2,644 or 1·67 per 1,000 in the province of Ulster; and 722 in the province of Connaught, affording a rate of 1·18 per 1,000 of the population of the province. As compared with 1920, a decrease of 148 is recorded for Leinster, 144 for Munster, 318 for Ulster, but the records for Connaught show an increase of 27.

Particulars regarding the sexes and ages of the persons who died from the various forms of tuberculous disease during the year 1921 are given in the abstracts of causes of death, commencing on page 16, also the provinces, counties, and superintendent registrars' districts in which deaths from tuberculosis took place. In Table III a comparison is shown of the summarized figures for 1921 with those for the ten preceding years.

The total numbers, as well as the mortality rates in 1921, and the ten years preceding are shown by sexes in the following table :—

YEAR.	MALES.		FEMALES		TOTAL		Annual Increase.		Annual Decrease.

SYPHILIS.—To this cause 75 deaths (43 of males and 32 of females) were ascribed, as against 90 (52 of males and 38 of females) in 1920. Of the 75 deaths, 50 were those of infants under one year of age. Six deaths in the year 1921 were caused by other venereal affections.

Deaths from general paralysis of the insane numbered 86; from locomotor ataxy, 34; and from aneurysm, 39.

PURULENT INFECTIVE SEPTICÆMIA.—The deaths assigned to this group amounted to 135, comprising 75 deaths of males and 60 of females.

CANCER.—Under this heading are included deaths returned as from carcinoma, sarcoma, cancer, malignant disease.

During the year the number of deaths from this cause numbered 3,895, affording a rate of 0·87 per 1,000 of the estimated population.

Of the total deaths, 1,969 were those of males equivalent to 0·87 of the estimated number of males in the population, and 1,926 were deaths of females, or 0·87 per 1,000 of the estimated female population in 1921.

The deaths among both sexes are 72 above those recorded for 1920 and 83 above the average (3,812) for the ten years 1911-20.

Particulars regarding age, sex, and parts affected by cancer amongst the persons whose deaths were registered in 1921 as from carcinoma, sarcoma, cancer, and malignant disease are set forth in Table IV.

TABLE IV.—Showing the deaths registered from Cancer* in Ireland during the year 1921, by Sexes, Ages, and parts affected.

*Including Carcinoma, Sarcoma and Cancer, Malignant Disease.

TUMOURS.—Deaths from tumours, either definitely stated to have been non-malignant, or as to which further information was not obtainable, were as follows :— From cerebral tumour, 40 deaths (of males 21 and of females 19) ; from ovarian tumour, 37 ; from uterine tumour, 38, and from other non-malignant tumours, 4 deaths. Among the latter 13 were returned as having been caused by tumour of the abdomen, 4 by tumour of the liver, 2 by tumour of the breast, 2 by tumour of the intestines, 2 by tumour of the bladder, and 2 by tumour of the lung.

RHEUMATISM.—Deaths assigned to rheumatic fever numbered 150, to chronic rheumatism, osteo-arthritis 444, the corresponding figures for 1920 being 277 and 417, respectively.

DIABETES.—There were 335 deaths from this cause, being 20 under the number registered in 1920 and 44 under the average (379) of the ten years ending with the last named year.

ALCOHOLISM.—Thirty-six deaths (31 of males and 5 of females) were ascribed to alcoholism, as compared with 42 in 1920. [Cirrhosis of the liver (included with the group of diseases of the digestive system) caused the deaths of 155 persons—118 males and 37 females.]

OTHER GENERAL DISEASES.—Among these are 42 deaths from rickets, 279 from pernicious anæmia, 67 from other anæmias, 31 from exophthalmic goitre, 21 from other diseases of the thyroid gland, 24 from diseases of the adrenals, 62 from leukæmia, lymphadenoma, Hodgkin's disease, and 5 from chronic poisoning by mineral substances.

MENINGITIS.—There were 473 deaths from meningitis (not returned as cerebro-spinal), those of males numbering 257 and of females, 216. In 1920 the number of deaths of males was 284 and of females, 261. Deaths from encephalitis (not returned as encephalitis lethargica) numbered 48 (of males, 32 and of females, 16) as against 52 deaths of males and 56 of females in 1920.

CEREBRAL HÆMORRHAGE.—To this title were assigned 1,989 deaths (864 of males and 1,125 of females) registered as from cerebral hæmorrhage and apoplexy, and 150 (55 of males and 95 of females) from cerebral embolism and thrombosis. The total deaths under this heading amounted to 2,139, being 181 under the number (2,320) recorded for 1920, and 220 under the average (2,359) for the decennium, 1911-20.

EPILEPSY.—There were 235 deaths from epilepsy—123 of males and 112 of females—registered during the year 1921, as compared with 246 in 1920.

CONVULSIONS.—Deaths attributed to convulsions numbered 868, 474 being deaths of males and 394 of females. Of the 868 deaths 697, or 80.3 per cent. were those of infants under one year of age. The deaths of infants under one year of age from convulsions constitute 9·9 per cent. of the deaths of infants (7,005) from all causes registered in Ireland during the year 1921.

HEART DISEASES.—Deaths from the various forms of heart disease amounted to 6,954 (of males 3,327 and of females 3,627) representing 1·55 per 1,000 of the population, or 10·9 per cent. of the total number of deaths from all causes in Ireland. Of the 6,954 deaths 18 were caused by pericarditis, 103 by acute endocarditis and myocarditis, 85 by angina pectoris, and 6,748 by other diseases of the heart. The 6,954 deaths are 56 below those recorded for 1920 and 774 below the average for the ten years, 1911-20

ARTERIAL SCLEROSIS.—The deaths thus assigned numbered 277 (the deaths of males being 178 and of females 99) as compared with 250 in 1920, and an average of 186 for the ten years ending with the latter year.

BRONCHITIS.—The number of deaths referred to bronchitis in 1921 was 4,415, being equivalent to 0·98 per 1,000 of the estimated population, or 6·9 per cent. of the total number of deaths from all causes. Of the 4,415 deaths 2,104 were those of males and 2,311 of females. The annual average number of deaths assigned to bronchitis during the preceding decennium was 6,307, the number for 1920 being 5,241. It must be borne in mind, when instituting a comparison with the figures for the years preceding 1921, that deaths from capillary bronchitis, formerly assigned to bronchitis, are, according to the revised International Nomenclature of Causes of Death, now included with deaths from broncho-pneumonia.

PNEUMONIA.—Deaths attributed to all forms of pneumonia, including capillary bronchitis (see remarks under the heading " Bronchitis") amounted to 3,502, a number equivalent to 0·78 per 1,000 of the estimated population, or 5·5 per cent. of the deaths from all causes registered in Ireland. Of the 3,502 deaths 1,334 were ascribed to broncho-pneumonia, 403 to lobar pneumonia, and 1,765 to pneumonia, not otherwise defined. The deaths of males from all forms of pneumonia numbered 1,994 and of females 1,508.

PLEURISY, EMPYEMA.—Deaths assigned to pleurisy, including deaths from empyema as to which the originating cause other than pleurisy could not be ascertained, numbered 173 and of these 114 were deaths of males and 59 of females.

During the eighteen years, 1904-21, the deaths of 552 persons (396 of males and 156 of females) were registered as having been caused by empyema. Resulting from special inquiry as regards the 396 deaths of males 100 were transferred to tuberculous disease, 37 to pneumonia (10 to lobar pneumonia, 7 to broncho-pneumonia, 2 to pleuro-pneumonia, and 18 to pneumonia, type not stated) 7 to influenza, 7 were assigned to injury, 2 to enteric fever, and 19 to other causes; 51 were stated to have originated with pleurisy.

The investigation into the 156 deaths of females resulted as follows:—41 were transferred to tuberculous disease, 18 to pneumonia (9 to lobar pneumonia, 3 to broncho-pneumonia, and 6 to pneumonia, type not stated), in 9 cases influenza was ascribed as the origin, in one enteric fever, and in 6 cases other causes were assigned. In 20 instances pleurisy was ascribed as the cause.

APPENDICITIS AND TYPHLITIS.—To this group 235 deaths were assigned (135 being those of males and 100 of females) as compared with an average of 209 for the preceding ten years and 269 deaths for the year 1920.

CIRRHOSIS OF THE LIVER.—This disease caused the deaths of 155 persons (118 males and 37 females) being 73 under the average (228) for the ten years, 1911-20, but 15 above the number registered in 1920.

ACUTE AND CHRONIC NEPHRITIS.—The deaths referred to this group amounted to 1,482, of which 254 were attributed to the acute and 1,228 to the chronic form of the disease. The 1,482 deaths are 141 below the average for the 10 years, 1911-20, and 94 below the number registered during the year 1920.

PREGNANCY AND CHILDBIRTH.

The mortality of women during pregnancy and childbirth is classified under three headings, namely, (1) septic conditions, (2) intrinsic accidents of childbirth and (3) disease or cause associated with pregnancy and childbirth. To the first group 187 deaths were attributed in the year 1921, to the second 269, and to the third 52; altogether the deaths of childbearing women numbered 508. This number is below such deaths in the year 1920 by 115. The total deaths represent a rate of 5·60 per 1,000 of the total births registered, as compared with 6·26 in the year 1920, and with 5·86 per 1,000, the average rate for the decade, 1911-20.

Table VI. shows that the mortality from puerperal septic diseases declined from 252 deaths in 1920 to 187 in the year 1921, and from accidents of pregnancy and childbirth from 298 in 1920 to 269 in 1921. The deaths of women from causes associated with pregnancy and childbirth which were 73 in the year 1920 fell to 52 in the year under review.

TABLE V.—Showing the number of deaths of women in pregnancy in 1921 definitely returned as either caused by or associated with pregnancy or childbearing.*

VIOLENCE.

The deaths from violence registered in Ireland during the year 1921 include 1,199 attributed to homicide, 138 to suicide, 21 deaths to execution, 10 deaths to wounds of war, and 1,392 were assigned to accidental causes; these taken together give a total of 2,760 violent deaths.

The deaths assigned to homicide (1,199) include those of 1,140 males (8 of these being infants under one year old), and of 59 females, 13 of whom were under one year old.

Of the deaths of males attributed to homicide, 1,096 were caused by gunshot wounds, and of the deaths of females, 37 deaths were so caused.

The suicidal cases (138) include the deaths of 109 males and 29 females.

The deaths, other than those which have been classified to homicide, suicide and execution, include 24 caused by poisons or poisonous gases, 281 by burns and scalds (151 of these were of children under five years of age), 225 by drowning, 108 by fire-arms, and 97 by vehicles of which 55 were motor-driven.

Of the 24 deaths (of males 19 and of females, 5) assigned to poisons or poisonous gases, 6 were due to coal gas, 2 each to food poisoning, laudanum, "narcotic" and petrol, and one death each to carbonic acid gas, strychnine, carbolic acid, chloroform, formalin, iodine, spirits of salts, asperin, Jeyes' Fluid, and there was one undefined case.

ILL-DEFINED CAUSES OF DEATH.

To this group 2,409 deaths were assigned, and of these 67 were described as "sudden deaths," and 2,342 were classified as "unstated or ill-defined causes."

UNCERTIFIED CAUSES OF DEATH.

Of the total deaths (63,838) there were 14,262 which were not certified by a medical practitioner; of this number 9,966 were deaths of persons aged 65 years and upwards, and 1,434 were of infants under one year of age. The uncertified deaths are 22·3 per cent. of the total deaths. The proportion of uncertified cases for the year 1920 was 22·2 and the average for the ten years, 1911-20, was 22·1.

Inquests.

According to returns furnished by the Registrars, the number of inquests during the year 1921 was 1,995, or one inquest for every 32 deaths registered.

AGES AT DEATH.

Deaths of children under 5 years of age during the year numbered 10,246, or 16·5 per cent. of all the deaths registered, the deaths of male children amounting to 5,633, or 17·4 per cent. of the total deaths of males, and the deaths of female children, 4,613 or 14·7 per cent. of the deaths of females at all ages.

There were 27,061 deaths of persons aged 65 years or upwards, being 42·4 per cent. of the total deaths registered. Included therein are 22,236 deaths of persons aged 70 years or upwards, or 34·8 per cent. of all the deaths recorded during the year.

Among these deaths are 438 of persons aged 95 years or upwards, 218 being those of males, and 220 of females, including 82 deaths, comprising 33 of males, and 49 of females, whose ages at death were returned as 100 years or upwards.

The ages in detail of the persons whose deaths were registered in 1921 are given by sexes, in the Abstracts commencing with page 12.

Infant Mortality.

The deaths of 7,005 infants under one year of age were registered in Ireland during the year 1921, a number equivalent to 77 in every 1,000 births registered as compared with 83 per 1,000 in 1920, and an average of 88 for the ten years 1911-20.

The deaths of infants under one year old in 1921 include 3,934 males and 3,071 females, the former number being equal to 85 per 1,000 births of males, and the latter affording a rate of 69 per 1,000 births of females. The corresponding infant mortality rates for 1920 were 90 and 75 respectively.

In 1921 and 1920 the rates for deaths of infants under one year of age in England and Wales were 83 and 80 per 1,000 births respectively, the rates for Scotland being 90 and 92 per 1,000 births registered.

The following table contains particulars regarding "Nineteen Town Districts," the remainder of the country, and Ireland as a whole, with corresponding figures in 1920 :—

AGES.	Infant Mortality, 1921—Deaths under one year per 1,000 Births registered.

The aggregate infant mortality rate for the "Nineteen Town Districts" in 1921 was 107·99 per 1,000 births registered, as compared with 119·61 in 1920. For the remainder of the country the rate was 60·77 as against 63·14 in 1920. Thus the rate for the town districts is 11·62 per 1,000, or 9·71 per cent. less than that for 1920, while the mortality among infants in the remainder of Ireland is 2·37 per 1,000, or 3·75 per cent. less than that which prevailed in the year 1920.

In Table VII. the rates for the entire country are given for each of the eleven years 1911-21 by causes of death, and in the case of the latter year by sexes and age-periods.

Similar information based on the births and deaths registered during the year 1921 in the Registrars' Districts containing the nineteen principal town districts of Ireland is afforded by Table VIII.

According to the Yearly Summaries of the Weekly Returns furnished by the Registrars, the infant mortality rates (corrected for births and deaths in institutions) for the "Nineteen Town Districts" in 1921 with the increase or decrease, as compared with the average rate per 1,000 births for the five years preceding, were as follows:—Dublin Registration Area 134, decrease 14; Belfast 115, decrease 11; Cork 76, decrease 26; Londonderry 82, decrease 23; Limerick 113, decrease 4; Waterford 103, decrease 7; Galway 105, increase 18; Dundalk 77, decrease 10; Lurgan 55, decrease 39; Drogheda 84, decrease 12; Lisburn 103, decrease 30; Newry 86, decrease 2; Portadown 99, decrease 14; Wexford 101, decrease 1; Ballymena 77, decrease 11; Sligo 73, decrease 48; Kilkenny 85, increase 12; Tralee 30, decrease 31; and Clonmel 61, decrease 9.

During the year 1921, the infant mortality rate for London was 80 per 1,000 births and in 1920 it was 75, the rate for Liverpool in 1921 was 105 per 1,000 births and in 1920 the infant mortality was 111; the respective infant mortality rates in 1921 and 1920 for Glasgow were 106 and 107, and for Edinburgh, 96 and 89.

Table IX. affords a comparison of the rates of infant mortality per 1,000 births in 1921 with 1920, represented by the deaths of infants under one year of age as *registered* in each county and county borough in Ireland.

TABLE VII.—Showing for Ireland the Mortality, by certain causes, among infants under 12 months old, per 1,000 Births registered in the eleven years 1911–1921, and by Sexes and Age-periods for the latter year.

Causes of Death.	Deaths of Infants under One Year per 1,000 Births Registered.

EMIGRATION.

According to the returns furnished to this Department by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants (natives of Ireland) who left the ports of Ireland during the year 1921 was 13,635, of whom 5,308 were males and 8,327 were females. Of the total emigrants, 1,115 were natives of the province of Leinster, 4,456 of Munster, 4,625 of Ulster and 3,439 of Connaught.

THE WEATHER.

Reports on the weather throughout Ireland during each quarter of the year 1921, as furnished by the Meteorological Office, London, are published in my quarterly Returns of Marriages, Births and Deaths for that year.

Is mise, le meas mór,

WILLIAM J. THOMPSON,

Ard-Chláruidhe.

Oifig um Chlárú Ghenearálta,
Tigh Charlemont,
Baile Átha Cliath,
An chéad lá de Mhí na Nodlag, 1922.

MARRIAGES, BIRTHS and DEATHS registered in the year 1921.

I.—PROVINCE OF LEINSTER.—MARRIAGES, BIRTHS AND DEATHS, 1921.

SUPERINTENDENT REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES.*

[Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births, instead of exceeding the deaths, were, in fact, *less than the deaths* to the extent stated.]

NOTE.—This Table has been constructed for the years 1847 to 1851—By taking the English average birth rate of one in 51, deducting the number of deaths and the number of emigrants in each year as given in the Irish Census Reports of 1851, an allowance proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861; and 1871, as explained for the last period.

1872 to 1914.—By adding the births registered in each year to the estimated population for the previous year, deducting the deaths and the number of emigrants, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911, respectively, and the population as shown by the Census in each of these years.

1915 to 1921.—The estimated population for each of these years has been computed as in 1914 with some additional adjustments with regard to the movements of the military.

AGES OF THE POPULATION OF IRELAND according to the Census of 1911.

INDEX TO SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the NUMBER or NUMBERS of each Superintendent Registrar's District in the Tables of Abstracts contained in the Report, in which the numbers run consecutively from 1 to 204 *]

A.

Abbeyleix	41
Antrim	119
Ardee	30, 33
Armagh	127
Athlone	46, 194
Athy	9, 42

B.

Bailieborough	132
Ballina	187
Ballinasloe	172, 195
Ballinrobe	188
Ballycastle	120
Ballymahon	27, 47
Ballymena	121
Ballymoney	122
Ballyshannon	138, 182
Ballyvaghan	61
Balrothery	4
Baltinglass	1, 10, 56
Banbridge	128, 146
Bandon	69
Bantry	70
Bawnboy	133, 183
Belfast	123, 131, 147
Belmullet	189
Birr	22, 100
Borrisokane	101
Boyle	196, 201

C.

Cahersiveen	86
Callan	14, 105
Carlow	2, 43
Carrickmacross	161
Carrick-on-Shannon	184, 197
Carrick-on-Suir	15, 106, 112
Cashel	107
Castlebar	190
Castleblayney	162
Castlecomer	16
Castlederg	165
Castlereagh	198
Castletown	71
Cavan	134
Celbridge	5, 11
Claremorris	191
Clifden	173
Clogheen	108
Clogher	166
Clonakilty	72
Clones	163
Clonmel	109, 113
Coleraine	157
Cookstown	167
Cork	73
Corofin	62
Croom	92

D.

Delvin	48
Dingle	87
Donegal	139
Downpatrick	148
Drogheda	31, 34
Dromore West	202
Dublin	6, 8
Dundalk	32
Dunfanaghy	140
Dungannon	168
Dungarvan	114
Dunmanway	74
Dunshaughlin	35

E.

Edenderry	12, 23, 36
Ennis	63
Enniscorthy	52
Enniskillen	154
Ennistimon	64

F.

Fermoy	75, 93

G.

Galway	174
Glennamaddy	175
Glenties	141
Gorey	53
Gort	176
Granard	28, 49, 135

I.

Inishowen	142
Irvinestown	155, 169

K.

Kanturk	76
Kells	37
Kenmare	88
Kilkeel	149
Kilkenny	17
Killadysert	65
Killarney	89
Kilmacthomas	115
Killmallock	77, 94
Kilrush	66
Kinsale	78

L.

Larne	124
Letterkenny	143
Limavady	158
Limerick	67, 95
Lisburn	125, 150
Lismore	116
Lisnaskea	156
Listowel	90, 96
Londonderry	159
Longford	29
Loughrea	177
Lurgan	126, 129, 151

M.

Macroom	79
Magherafelt	160
Mallow	80
Manorhamilton	136, 185
Middleton	81
Millford	144
Millstreet	82
Mohill	186
Monaghan	164
Mount Bellew	178
Mountmellick	24, 44
Mullingar	50

N.

Naas	13, 57
Navan	38
Nenagh	102
Newcastle	97
New Ross	3, 18, 54
Newry	130, 152
Newtownards	153

O.

Oldcastle	39, 137
Omagh	170
Oughterard	179

P.

Portumna	180

R.

Rathdown	7, 58
Rathdrum	59
Rathkeale	98
Roscommon	199
Roscrea	25, 45, 103

S.

Scarriff	68
Shillelagh	60
Skibbereen	83
Skull	84
Sligo	203
Strabane	171
Stranorlar	145
Strokestown	200
Swineford	192

T.

Thomastown	19
Thurles	104
Tipperary	99, 110
Tobercurry	204
Tralee	91
Trim	40
Tuam	181
Tullamore	26, 51

U.

Urlingford	20, 111

W.
